

## **COMPANY PROFILE**

### **ABOUT US**

Civilpro Engineering Solutions is a multidisciplinary civil engineering firm that offers a wide variety of consulting and concrete manufacturing solutions. Consulting and design services ranging from the flood line determinations of newly planned developments, general civil engineering, infrastructure development and precast engineering. We do consulting and project management of projects ranging from small residential developments to large industrial sites and also pride ourselves on being precast concrete manufacturing specialist who will produce any required product either at our own facility or in partnership with our client on-site if feasible. The company was founded in 2016 and is establishing a valued reputation in the industry as a dependable engineer partner in finding innovative solutions to exciting engineering challenges.

### **GROWTH PROFILE**

We have since inauguration in 2016 focused and matured our expertise into the project management and consulting segment of the business together with various clients on residential, commercial and industrial projects. Being involved in the smallest home expansion project to new double volume offices in a factory, doing turnkey housing developments in Sandton to installing a longline prestressing sleeper manufacturing system for a precast concrete producer. Our building teams are NHBRC registered and offer only the best quality work under our strict engineering standards. In January 2018 we opened our precast concrete production facility in Cape Town under the Civilpro Precast banner.

### **OUR VISION**

To be the foremost provider of outstanding engineering solutions by consistently improving through innovation, foresight, integrity, and aggressive performance.

### **OUR MISSION**

To be the leader in providing value-added construction solutions to our customers by creating a successful partnership with them through professional and specialized services.

### **OUR GOAL**

To ensure the longevity of our company through repeat and referral business achieved by customer satisfaction in all areas including meticulousness, proficiency and service-minded attitudes.

### **OUR VALUES**

To maintain the highest levels of professionalism, integrity, honesty and fairness in our relationships with our professional associates, clients and suppliers

### Executive Summary

**Coenraad Groenewald**  
**PR Eng Tech, B.SC Civil (EU), MSAICE**  
**Owner and Managing Director**

I am a dynamic engineer who is driven by the challenges and diversities of the civil engineering industry. My career as Civil Engineer started in 1999 with The Aveng Group and I completed 18 years of service with Aveng Infraset, the precast manufacturing company within the group. I matriculated from Dr E.G.Jansen High School in 1997 and after being awarded a bursary from the then called Grinaker, I completed my B-Tech Civil Engineering (Construction Management) in 2003 at the Tshwane University of Technology. At the same time, I finished my BSc ICEM (International Civil Engineering Management) degree at the Hanze University in the Netherlands. In 2015 I registered as a professional with the Engineering Counsel of South Africa.

From 2010 to 2012 I served as the President of the CMA for the Pipes division, and was also the representative for Infraset at the SABS, IMESA, SAICE, SARF and CESA.

I have since the investiture of Civilpro Engineering Solutions focused my energy and personal growth on my consulting expertise and have been involved in various projects and developments across all aspects of Civil Engineering.

To stay abreast of the latest technology, I regularly attend courses and conferences locally and abroad and have built valuable relationships with key industry alliances to offer my clients the best possible service.

My driving force lies in clearly ascertaining the requirements of my clients and developing modern, innovative, cost effective solutions to these challenges.
